SUMMARY

Computer Engineering graduate with hands-on experience providing IT support, troubleshooting hardware and software issues, managing IT assets, configuring network devices, and documentation. Familiar with Microsoft 365 administration, Windows environments, Active Directory fundamentals, and networking concepts. Eager to contribute strong technical support, customer service, and problem-solving skills in an IT Support Engineer, Microsoft Support, or IT Administrator role.

EXPERIENCE

IT Application Support Engineer, Gaming | LaVie Resort and Casino | LaVie Resort and Casino 1588 Pedro Gil St., New Coast Hotel Manila | SEP 2026 – PRESENT

- Investigated and resolved escalated technical issues related to software/hardware applications that cannot be resolved by Level 1 support.
- Identified, analyzed, and diagnosed software-related problems, escalating issues to appropriate teams when necessary.
- Resolved incidents in accordance with established service level agreements (SLAs).
- Documented all support activities, including troubleshooting steps, root cause analysis, and resolutions.
- Provided timely and clear status updates to users and stakeholders regarding their support requests.
- Performed routine application maintenance, patches, and updates to ensure optimal performance and system stability.
- Developed and maintained software applications using programming languages such as Python, Java, JavaScript, C#, or similar technologies.

IT Intern | Tiger Global Business Services, Inc. | Alabang, Muntinlupa | FEB 2026 – MAY 2026

- Handled Microsoft 365 Administration/Admin Centre (account creation, mail handling, password reset, license tracking, domain creation, user-lifecycle, permission access, etc.)
- Troubleshoot hardware and software issues for end-users, improving resolution time.
- Maintained IT inventory and asset management systems, ensuring up-to-date records.
- Conducted routine maintenance on computer systems and peripherals.
- Aided in user account creation and permissions management across systems.
- Installed, configured, and tested hardware components such as routers, switches, firewalls, and servers.
- Updated hardware, software, and security protections with the latest standards.
- Resolved daily IT desktop client issues for multiple departments across various offices.
- Created and maintained technical documentation for IT processes, system configurations, troubleshooting procedures, and asset records to ensure consistent support practices and facilitate knowledge transfer across the IT team.

SKILLS

- **Operating Systems:** Windows 10/11, Windows Server (Basic), Linux (Basic)
- **IT Application Support, Gaming:** IT Casino Operations, FSG, GTT, FPI, BSB, PCMS, Supernova, TrT Kiosk, Trends, Freshservice, Tables Troubleshooting, Perfect Pay, PoS
- **Microsoft Technologies:** Microsoft 365 Admin Center (Purview, Identity, Exchange, Sharepoint, Teams, Azure), Power Automate, Outlook, OneDrive

- **Networking:** TCP/IP, DNS, DHCP, VLAN, Routing & Switching, WiFi Troubleshooting, Network Security & Infrastructure, Servers (Basic)
- **IT Support:** Hardware Troubleshooting, Software Installation, Computer Assembly, Printer Support, Asset Management, Remote Desktop, User Account Management, Help Desk Support, Documentation of IT Process
- **Tools:** Active Directory (Basic), Cisco Packet Tracer, Visual Studio, Git, Microsoft Office, Anydesk
- **Programming:** Python, JavaScript, C++, Embedded C, HTML, CSS, OOP
- **AI & Machine Learning:** TensorFlow, NumPy, MediaPipe, OpenCV, Computer Vision
- **Embedded Systems:** IoT Systems**,** Raspberry Pi, ESP32, Arduino, PCB Development, Circuit Design, Sensors & Actuators
- **Soft Skills:** Problem Solving, Team Leadership, Communication, Adaptability, Collaboration, Learning Aptitiude

---

PROJECTS

Intellisort – Machine Learning-Based Reverse Vending System

- Developed a machine learning-based reverse vending machine that classifies PET bottles and aluminum cans using computer vision for real-time waste segregation. Implemented an automated reward system with coin dispensing and IoT-based monitoring to improve recycling engagement and system efficiency.
- **Tools & Technologies:** Python, Teachable Machine (TensorFlow Lite), Raspberry Pi, OpenCV, Blynk IoT, ESP32, Embedded Systems, Computer Vision

GLUCS – Gas Leak Detection and Safety System

- Engineered an IoT-enabled gas leak detection system with automated response mechanisms to enhance safety in residential and industrial environments. Integrated real-time gas monitoring, voice alerts, exhaust control, and fire prevention features to reduce risk of explosions and hazards.
- **Tools & Technologies:** ESP32, Arduino IDE, MQ-2 Gas Sensor, Blynk IoT, Embedded C/C++, IoT Systems, Sensors & Actuators

Solar Seeker – Light Tracking System

- Designed and built an Arduino-based solar tracking system that automatically aligns toward a light source using sensor-driven feedback and servo motor control. Improved energy efficiency through real-time light detection and mechanical positioning.
- **Tools & Technologies:** Arduino Uno, C/C++, Photoresistor (LDR), Servo Motor, Embedded Systems, Circuit Design

---

EDUCATION

Bachelor of Science in Computer Engineering | 2022 - 2026

National University - Dasmariñas, Cavite

Awards Received:

- Dean's Lister 2nd Honor Term 1 | 2022-2023
- Best Capstone Presenter

CERTIFICATIONS

IT Specialist – Networking

Certiport (JUN-19-2025)

- **Skills:** Basic Network Infrastructure, Internet Protocol, Local Area Networking, Network Security, OSI Model, Wide Area Networks, Wired and Wireless Networks

IT Specialist – Software Development

Certiport (OCT-7-2025)

- **Skills:** Core Programming**,** Databases, Desktop Applications, General Software Development, Object-Oriented Programming, Web Applications
